

Barrel Clamps

Barrel Clamps - Called "Barrel Clamp", this particular hydraulic attachment is actually utilized on forklifts so as to compress items that you wish to transfer using the forklift. Normally, they are utilized in order to barrels, handle kegs, and paper rolls, along with a few barrel clamp designs having the ability to revolve the load. Like for instance, the revolving function enables the person operating the forklift to put in a vertically stored paper into the horizontal intake of a printing press.
